DevOps Engineering 2026 – Projects

adiftene@info.uaic.ro

Project themes

- In the first two weeks you should find a place in a working group (3-4-5-6 persons), a coordinator for the research part and a topic
- Topics may be proposed by you or your coordinator
- It may be a paper license that add additional advanced concepts of DevOps

How we work

- On the topic set you will work in ASET lab where you will receive mark to implement advanced SE techniques + DevOps components
- You'll periodically present to your DevOps coordinator your progress
- You'll also periodically present to your coordinator (who is your customer) your progress
