

## Lab 7,8 – Deadline weeks 9 (same groups of minimum 3)

### Themes laboratory:

1. Implementation
2. SVN
3. Team coordination, negotiation

### Problem 1 [40 points (20+20)]

On established themes continue work at the project (**All names will be in English**). Implement the main components of the project so you have a **first functional version**.

The project will be saved on Github/Bitbucket. One person from the team will coordinate the team and will know what the members have done and will make a short presentation of components made by them. Also, this person will establish and negotiate points that deserve each team member.
